

MISSOURI BOATING STATISTICS & DROWNINGS

2025 Edition

2024 Statistics

Department of Public Safety
Missouri State Highway Patrol

Introduction

This booklet is published by the Missouri State Highway Patrol as an aid to persons who are interested in recreational boating crashes and accidental drowning incidents occurring in the state. It contains information which provides a comprehensive look at statewide crashes and accidental drowning incidents as experienced in 2024.

The Missouri State Highway Patrol is the central recreational boating data collection agency for the State of Missouri. The Patrol investigates all recreational boating crashes occurring in the state and either investigates or gathers data on accidental drowning incidents occurring in state and private waters.

Interesting Statistics

Here at a glance are some interesting statistics found in this booklet:

- In 2024, there were 14 persons killed and 72 persons injured in recreational boating crashes in the state of Missouri. This was 8 more killed and 17 fewer injured than in 2023. There was a decrease of 19.5% in total crashes statewide (128) compared to 2023 (159).
- In 2024, there were 128 total crashes including 67 property damage only, 49 injury, and 12 fatal.
- "Failed to keep proper lookout" was the leading contributing circumstance for all crashes followed by "inattention." "Impairment (alcohol/drugs)" was known to have been a contributing circumstance to 10 crashes statewide.
- "Inexperience of the operator" crashes resulted in the death of two people. This was 14.3% of the total persons killed in crashes.
- Of all crashes reported statewide, 79.7% (102) occurred during the months of May through August.
- Most crashes occurred on Saturday (49) and Sunday (22) and most (80) occurred from noon to 7:59 p.m.
- In 2024, 68% (87) of boat crashes involved just one watercraft. All 12 fatal crashes also involved only one watercraft.
- Of the 155 boat operators involved in crashes, 75 had no prior boater education.
- In 2024, there were 25 persons killed in accidental drowning incidents occurring in state waters, 5 more than in 2023. There were also four accidental drowning incidents that occurred on private property and an additional six that were flood/other related.
- Most drownings occurred on Saturday (7) and Sunday (7) followed by Friday (6) and Tuesday (6), and during the months of June (10) and July (7).

It is hoped that the information in this booklet will be of value to you. Certainly it is the most comprehensive look available at statewide crashes and accidental drowning incidents in Missouri.

Alcohol Involvement

Drinking and Crashes - Whether or not a person has been drinking cannot always be determined at the scene of a crash. Because of the time lapse from the moment of occurrence until an officer arrives at the scene to make the investigation, a person's condition concerning drinking can change a great deal. In cases where the individual may have been removed to a hospital, doctor's office or funeral home, his/her condition may never be determined.
